

## **Quickoffice for Palm 7.6.4 Release Notes**

This updated version of Quickoffice adds support for new devices by GSPDA, network document access, transferring documents via SMS plus various enhancements/improvements:

### **Enhancements:**

- GSPDA smartphone models M68 and M98
- Support for opening, editing and saving documents via network
- Support for transferring documents via SMS
- Improve compatibility with CJKOS (Chinese, Japanese, Korean OS)
- Improved support for Chinese documents in both traditional and simplified forms

### **Quickpoint:**

- Added the ability to use hardware buttons on slide selection screens.
- Slide numbers display correctly and clearly on screen.
- Device stays awake during slide show.
- Activating menu during slide show pauses slide show.
- Toolbar restored after user dismisses dialog.

### **Quicksheet:**

- Using symbol popup works correctly in edit field.
- Cell text now defaults to black after cell formatting is cleared.
- Workbook protection functions as expected.
- Worksheets can be transferred as HTML more than once without restarting Quicksheet.
- Font dialog displays clearly.
- Graffiti area displays properly when toggled on/off.
- File list displays properly when minimizing Graffiti area.
- Toolbar in file list view now redraws as expected.
- New style dialog now has Graffiti Shift Indicator.

### **Quickword:**

- Find/Replace details are now preserved.
- Find/Replace dialog now docked with bottom of screen when Graffiti area minimized.
- Clear key on M28/M68 smartphones functions as backspace.
- Added ability to view file list when 200+ documents are stored on external card.
- “.htm” suffix no longer added to documents transferred via IR/Bluetooth/SMS. (This prevented documents from being transferred multiple times.)
- Chinese text in new document correctly translates to file name.
- Corrected various minor issues occurring when the Graffiti area is minimized.
- When minimizing toolbar, text displays correctly.
- Searching empty document works as one would expect.
- Toggling backup, search and privacy icons on file list view displays correctly.
- Tips for View Options displays correctly when device is using Chinese language.
- Tip for Export eBook dialog is now appropriate.
- Display problem on older Sony Clie PDAs has been fixed.
